Hi-tech burglar alarm systems

Tecnoalarm, established in 1977 and motivated by a great passion for security, has immediately placed great emphasis on advanced technological research and on the development of simple but efficient solutions that meet the requirements of the market.

High-quality products and a high level of innovation very soon allowed Tecnoalarm to dominate the market and boost its growth. Today, the company is leader in Italy and strongly present in the world.

HI-TECHNOLOGY & DESIGN
WORLDWIDE FROM ITALY

The evolution of fire alarm systems

Since 2014, the historic Tecnoalarm plant houses the offices and production facilities of Tecnofire, the company division dedicated to automatic fire alarm systems. The plant extends to an area of 3,000sqm and houses the departments of Research and development, Sales and marketing, the production as well as the demo and training rooms.

The Tecnofire brand, just as Tecnoalarm, promotes technology, innovation and design rigorously *made in Italy*.

The entire range of products is certified and made according to the highest standards of design and construction, the same which earned the parent company national and international success.

Tecnoalarm®

EN 50131 certified products

Hi-tech burglar alarm systems

More than 40 years of Tecnoalarm research ushered in a new era. Now, the **new Evolution systems** (synchronization and 2-way wireless communication) complement the prestigious **TP systems** (10 to 440 hard-wired and wireless zones), thus satisfying every requirement for protection, from small homes to large complexes.

RSC® technology establishes the communication between the systems and the technical control station of the installation company.

A multitude of possibilities of access to the systems ensure universal applicability on every kind of user.

Tecnoalarm, ahead of the market, has obtained the **certification of its systems** for the use with the main virtual assistants.

amazon alexa

Amazon, Alexa and all related logos are trademarks of Amazon.com, Inc. or its affiliates

supervisor

Interactive supervision of burglar and fire alarm systems

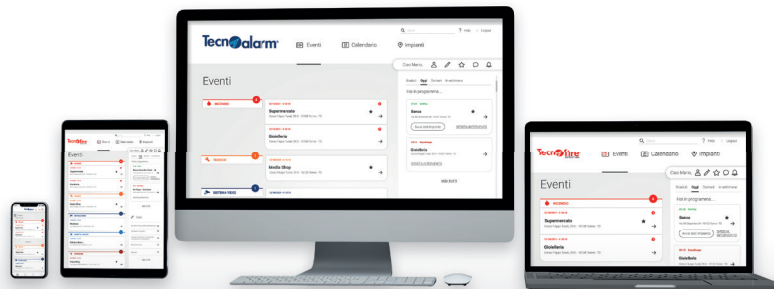

Integration of intrusion and fire detection as well as video surveillance in one multi-client platform. Innovative graphic interface, customizable by the user, with guided procedures in line with the security plan of the building.

tecnocloud

Connectivity and maintenance services in one progressive web app

A portal for users and installers permitting the connection with all systems simultaneously, by PC and on the move. Tools for the coordination and the maintenance according to the standards and rules of the sector and access to the documentation of Tecnoalarm and Tecnofire.

Innovation in service

Support - Assistance - Training

Tecnoalarm services

Tecnoalarm

TES TECNOALARM ENGINEERING SUPPORT

The engineers provide **support** and advice for the design and setup of systems that guarantee the best security for all three protection levels, in line with the increasingly severe regulatory standards.

TTS TECNOALARM TECHNICAL SERVICE

Highly specialized technicians work in close contact with the Tecnoalarm R & D department and are always available to **assist** the installers in programming the systems and searching proactive solutions.

TTA TECNOALARM TRAINING ACADEMY

The academy has the aim of **training** the professionals of the sector on the regulatory framework and the technological innovations.

Tecnofire services

Tecnofire
DETECTION

TES TECNOFIRE ENGINEERING SUPPORT

The TES team employs modern software tools to **support** the system engineers during the design and setup of the systems.

TTS TECNOFIRE TECHNICAL SERVICE

Thanks to RSC® technology, the technicians from the TTS team are able to **assist** the installers in programming and analyzing the functioning of the systems, in real time and from a distance.

TTA TECNOFIRE TRAINING ACADEMY

The academy teachers **train** the professionals of the sector on a daily basis regarding the systems, up-to-date technologies and regulatory standards.

EN 54 certified products

Automatic fire alarm systems

The automatic fire alarm systems designed by Tecnofire have a modular structure, are remotely controlled and, after testing by accredited Italian and European certification bodies, have received EN 54 certification.

The implementation of RSC® technology guarantees an added value in system management.

Thanks to remote management, it is indeed possible to program and control the operating parameters of the systems from a distance and reduce the time and costs of maintenance.
